

ROTAX.

**CHANGE
THE
RACE.**

**BOOST YOUR
PERSPECTIVE.**

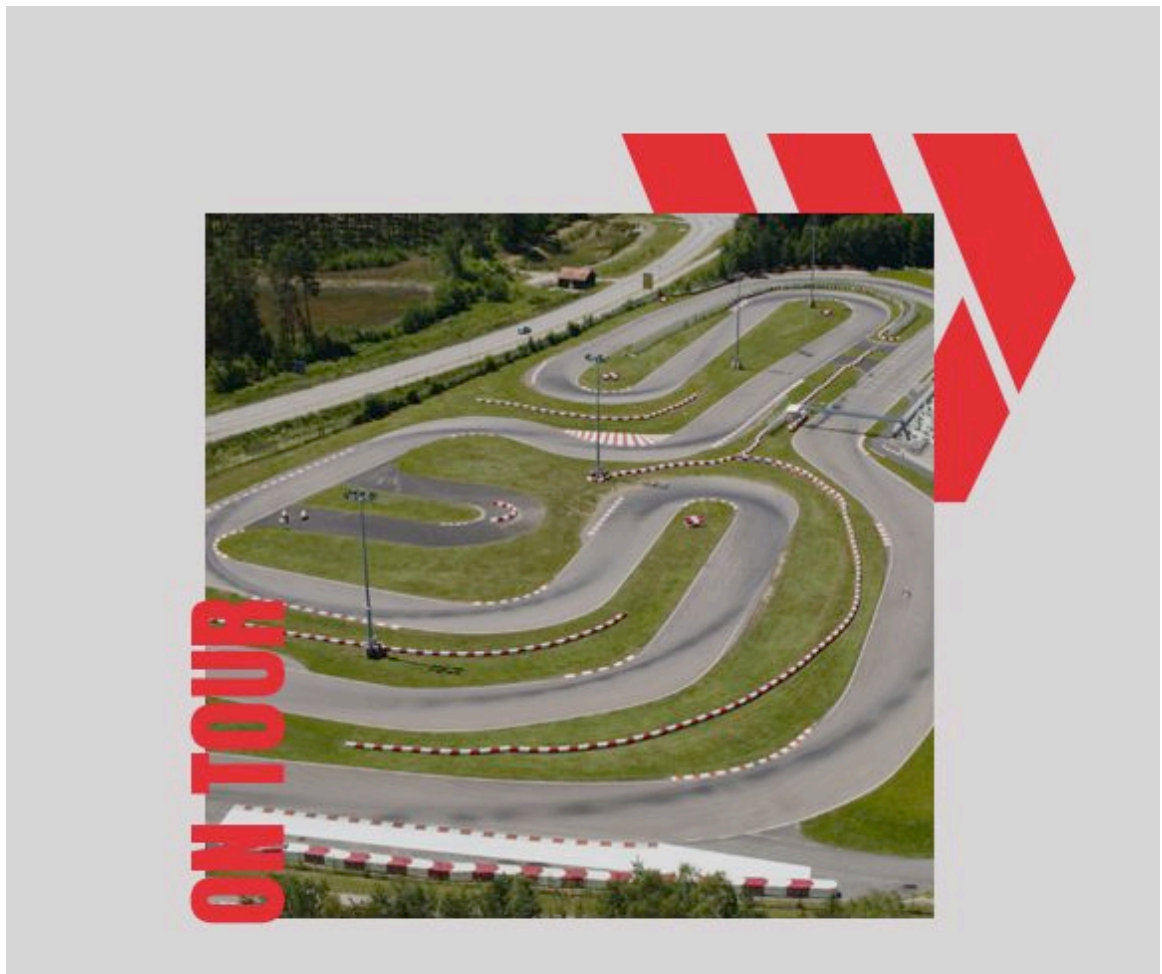

START YOUR ADVENTURE. You jump into the Rotax Project E20, press the two buttons on the steering wheel, start the engine and pull down the throttle - this moment will swap your racing experience. The unbeatable acceleration speeds you up from 0 to 100 km/h in 3,5 seconds. But the fun continues with the Boost button on the steering wheel which increases the power of the E-Kart for up to 5 seconds.

ARRIVE AND DRIVE. The Rotax Project E20 provides all the infrastructure. The set-up is simple. You arrive at the tour box, slip into your own race gear (racing suit, helmet, gloves, shoes) and just start riding. Our Rotax experts will assist you with data analysis and give you advice and support. The E20 can do 25 laps on a single charge. For E20 drivers, these are the ingredients for a perfect race day - maximum time on the track without much effort.

STAY TUNED. The 2022 season comes with several opportunities to arrive, drive, and boost your perspective. Check out our [European tour dates for the Rotax Project E20](#), and book your seat to experience a completely new way of racing. For more information look at our [website](#).

ENJOY YOUR RACE.
